Testimonials

Histopathology & Microbiology Manager Harrogate District NHS Foundation Trust

“As a company you have always been there as a partner when we have hit snags. Whether these have been due to issues with other suppliers or with our own ordering systems, it seems that when we have a problem our first port of call is Sterilab and you have met every challenge directed to you.

...
Sterilab have always been a great company to work with and it seems nothing is ever too much to ask of you.

...
The support and commitment of Sterilab has been even more noticeable over the last year while facing SARS-CoV-2... I want to take this opportunity to thank you formally for your excellent service and support”

Product Manager Katalyst Laboratories

“A reliable supply chain which has given us confidence to expand our client base at short notice. They have given us the best value for money, with a super responsive team that has helped us respond quickly to our customer demands. ‘The dynamism we (Katalyst) operate with is greatly supplemented by the proactive Sterilab’s team & reliable product supply.”

Point of Care Testing Co-Ordinator East Lancashire Hospital Trust

“We consider Sterilab to be our “Gold Standard” as a company. We receive orders, quotes, technical help very quickly and efficiently. Nothing seems too much trouble for the team!”

Company Quality Policy

“Sterilab is committed to offer products of leading quality and design - which consistently meet or exceed the needs and expectations of the professionals we serve”

Trevor Frizelle, Partner and Quality Manager

Sterilab Services is a family business with over 40 years experience supplying virology.

We have a strong focus on continuous improvement and maintain an integrated Quality and service Management System (QMS) to deliver on this commitment.

All products supplied for clinical use are assessed for compliance with relevant regulatory requirements - such as CE marking according to the IVD directive and the MHRA. We work with manufacturers who are regularly assessed and maintain certification against ISO 9001 and ISO 13485 standards - and whose core values of quality and reliability accord with our own.

Our Commitments to You

Supplier Validation

Sterilab works closely with a careful selection of world class manufacturers. This involves an extensive documented due diligence process – including physical inspections of production facilities and assessment of the manufacturer's Quality Management Systems. The assessments are performed by top tier legal compliance and inspection professionals. This ensures the products you receive from us can be relied on to perform consistently.

1

Placing Orders

Sterilab has made significant investments to place stock into our UK warehouse facilities. We offer overnight courier deliveries on orders placed before 3pm. Orders can be placed on-line on our web-store, by email – or give us a call to discuss your needs. For the ultimate in security – we offer call-off and standing orders with stock reservation.

2

Lab Testing & Validated Quality

With over 20 years of experience in supplying high quality leading brand laboratory consumables, we have a good idea of the attributes that are important. However the real proof is putting them into use. All products offered by Sterilab are supplied to real users for evaluation – and we offer free samples so you can try them yourself - in your lab, on your equipment.

3

Contractual Compliance

Sterilab Services has successfully supplied precision plastic laboratory consumables under contract to public sector clients including the Department of Health (DHSC), NHS Supply Chain, CSS Scotland, NHS Blood and Transplant, NIBSC, PHE and NHS Wales, as well as many individual NHS Trusts - since 2001. We also supply clients in Universities, Pharmaceutical and diagnostic manufacturers. We offer a fast, flexible, and reliable service and no-quibbles return policy if products are unsatisfactory.

4

Traceability & Authenticity

We check the authenticity of all ISO, CE & FDA certificate / registration certificates with the issuing certification bodies and competent authorities in the country of registration.

5

Filter Tips

Key Features

- Supplied in sterile racks of 96 or 100 tips
- PE sintered filter provides an aerosol barrier eliminating cross-contamination
- Free of detectable DNase/RNase, human DNA and pyrogens
- Electron Beam sterilization leaves no chemical residue

Quality Manufacturing

- Precision manufactured from high clarity virgin polypropylene
- Optimized bore provides a precise fit and secure seal for accurate pipetting
- Superfine molding technology minimizes fluid retention in the tip
- ISO9001:2015 certified production facility
- Manufactured and packaged in class 100,000 cleanrooms

Compatibility

These are universal fit tips, compatible with specific pipettors from brands including Thermo, Gilson, Eppendorf, Labnet, VWR, Brandtech, Sartorius, Biohit and more. Both electronic and mechanical pipettes available, with full compatibility lists available on request.

Availability

We hold stock on the ground in the UK for same day dispatch and next day delivery, for orders placed before 3pm. To order, go to www.sterilab.store or email us with your requirements at sales@sterilab.co.uk.

Cryogenic Storage Vials

Key Features

Certified completely free of human DNA, PCR inhibitors, DNase, RNase, Pyrogens, ATP

Designed for storing cells, blood, serum and other biological fluids

Suitable for low temperature storage down to -175 ° C

Printed graduation in 0.1ml increments

Sterilised by beta-ray SAL10-6

Autoclavable at 121°C steam for 20 minutes

Leak Resistant Silicone Seal

- Colour coded caps for easier identification
- Unique bi-injected seal moulded into the screw-cap no leaking, no contamination, excellent grip
- New cap for automatic de-capping

Unique 2D Barcode

- Readable with most barcode readers
- Double decoding readable by both sides
- Linear bar code printed on the tubes
- Innovative solution to manage your samples
- Storage location management

Centrifuge Tubes

Key Features

Particularly suitable for application in PCR and other applications in molecular biology

Graduated with writing area

Autoclavable open at +121°C for 20 minutes

Optimal transparency

Temperature of use: -80°C + 100°C

Human DNA, DNase, RNase, Pyrogen, ATP, PCR inhibitors free certified

Pierceable writing cap

Precise lid sealing avoids evaporation during long-term storage

Hinged lid prevents any unintentional opening during use

CE-IVD marked

Centrifuged at:
0,5ml - 1,5ml - 2,0ml 17,500 rpm
- 30,000 x g - 5mL at: 14,200 rpm -
21,000 x g

Zip bags, re-closable

Applications

1. Molecular biology, cell culture, chemistry and biochemistry

2. Biotech and Pharmaceuticals

3. Boiling Application

4. Laboratories and Research

5. Preparation, centrifugation and storage of samples

Details

- Bidirectional graduation and negative graduation improve the accuracy
- Color code on tips make pipettes easily recognizable
- Lot number printed on packaging for tracking
- RNase-free, DNase-free and non-pyrogenic
- Sterile at gamma rays 10-6
- CE-IVD Marked

Swabs & Universal Transport Medium

Swabs & Universal Transport Medium

Transport Swabs for the collection, transport, maintenance and long term freeze storage of samples for the detection of Virus including influenza, Chlamydia, Mycoplasma and Ureaplasma.

Features & Functions

- UTM Swabs are room temperature stable, also incorporates a cryoprotectant
- Safe and reliable precision moulded breakpoint swabs with a capture cap which automatically locates the viral swab into the lid for transport.
- Formulation also includes antibiotics to inhibit bacterial and fungal flora.

- Safe, shatterproof, stand-up tubes with internal conical shape enabling centrifugation of samples.
- Rapid release and dispersion of sample material and virus particles during vortexing with three glass beads in tube.
- Available as filled Universal Transport Medium tubes in bulk or as patient sample collection packs with either Flocked Swab (regular or mini tip) or polyester fiber swabs.

Flocked and Nylon

- Flocked swabs utilise innovative nylon fibre technology to provide outstanding sample collection and release.
- Rapid automatic elution for instantaneous and spontaneous release of sample into liquid media
- Sample release from the flocked swab is at least 95% compared to 25% with a regular fibre swab.
- Compatible with rapids, EIA, molecular, DFA, cytology, bacteriology and viral culture applications

Dry Swabs

- Dry swabs supplied in paper peel pouch or in a tube.
- Low moisture permeability
- Sterile dry swabs used for sample collection and transfer
- CE marked as Class IIa (medical device directive 93/42EEC transient invasive use).

E-Swabs

For collection and transport of clinical specimens containing aerobes, anaerobes, fastidious bacteria, viruses and chlamydia. E-swabs are transport swabs that can be processed using standard laboratory procedures for bacterial culture and molecular detection of bacteria, viruses and chlamydia. Complies with NCCLS-A standard- maintains aerobes, anaerobes, fastidious bacteria for up to 48 hours at room temperature.
